Index for Volume 94

AUTHOR AND SUBJECT INDEX. Pages indicating errata are in italic. S indicates June abstract supplement. Publication no. P-2004-1025-01O.

Abad, J. A., S1, S39, S95
Abad, Z. G., S1, S95
Abawi, G. S., S1
Abbas, H. K., S1
Abbasi, P. A., S2
Abdukarimov, A. A., S35
Abi Ghanem, R., S90
Abler, S., S2
Abou Ghanem-Sabanadzovic, N., S2, S90, S91
Abou-Jawdah, Y., S2
Abril, M., S143, S148, S167
Abu-El Samen, F. M., S2, S54, S156
Acevedo, M., S156
Acidovorax avenae
—on watermelon: biocontrol by seed, S30; populations on blossoms, S59
—on watermelon and melon, strain in Israel, S12
Actinidia deliciosa, postharvest rot, biocontrol with grape volatiles, 1280
Adaskaveg, J. E., 52, 163, S3, S25, S31, S49, S83, S97, S149, S151
Adelfinskaya, Y., S113
Adhikari, T. B., 1198, S2
Adkins, S., S3, S4, S48
Adler, N. E., 154
Aebig, J. A., S3
Aegerter, B. J., S3, S149
Aegilops speltoides, leaf rust, new *forma specialis*, 94
Aerobiology
—*Fusarium* and *Verticillium*, dissemination by shore flies, S151
—spore transmission and El Niño events, link, S84
Agarkova, I., S85, S88
Agostini, F., 351
Agostini, J. P., S3
Agrama, H. A., 858
Agrobacterium spp.
—A. *tumefaciens*, on cranberry stems, galls, cover photo, November
—*A. vitis*: on grape, wound healing factors, S22; on tobacco and grape, hypersensitivity and necrosis, S39
Agropyron mosaic virus, *Hordeum mosaic virus* genome sequence, reciprocal monophyly, S32
Ah Fong, A., S48
Ahimera, N., 1189
Ahn, I.-P., S3
Aime, M. C., S82, S124
Ainsworth, T., S23
Akomah, A. R., S101
Alabouvette, C., 661
Albano, J., S113
Albersheim, P., S122
Albiach, M., S131
Albiston, A., S163
Alderman, S., S85
Aldwinckle, H. S., S62
Alexander, B. J. R., S57
Alexander, S. A., S142
Alfalfa
—*Aphanomyces euteiches*, races in Illinois, S160
—*Aphanomyces euteiches* and *Phytophthora medicaginis* interaction, PCR evaluation, S43
—disease resistance and stand persistence, relation, S5
Alfalfa mosaic virus, on tomato, *Am* gene, chromosome 6, 345
Alfano, J. R., S121, S136
Alfenas, A. C., S21
Ali, S., 1056, 1061, S3
Alkowni, R., S61
Allan, M. A., S149
Alldredge, J. R., S152
Allelopathy, soilborne pathogens controlled by, S101
Allen, J., S4
Allen, R., S33, S42
Allen, T. W., S3, S4
Allende-Molar, R., S4
Alleyne, A., S156
Allium spp., rusts, biology and sequence analysis, 569
Allorent, D., S92
Almeida, R. P. P., S9
Almond
—bacterial canker, peach hybrid, susceptibility in California, S151
—leaf disease, biocontrol in California, S31
—leaf scorch, factors in California, S36
—union mild etch, scion and irrigation influence, S20
Al-Niemi, T. S., S4
Al-Saadi, A., S26
Alternanthera mosaic virus, on phlox and portulaca, strains, S38
Alternaria spp.: on *Arabidopsis thaliana*, pathogenicity model study, S42; on carrot, biocontrol with *Clonostachys rosea*, 551; phylogeny, gene sequences, S42
—*A. alternata*, mannitol biosynthetic genes, disruption, S106
—*A. brassicicola*: on *Brassica*, pathosystems as model, genomics, S22; on *Cakile maritima* and *C. dentula*, in Australia, S9
—*A. mali*, boscalid sensitivity, assay methods, S63
—*A. porri*, on onion, bacterial relation, S156
—*A. solani*, azoxystrobin sensitivity, Wisconsin, S161
Alvarez, A. M., S49, S152, S155
Álvarez-Ramos, R., S35
Amane, M., S47
Amanyenu, T., S72
Ambrose, J., S36
Amemiya, Y., 813
American Phytopathological Society
—annual meeting abstracts, S1, *796*, *1031*
—annual report, 16
—author index to abstracts, S172
—excellence in extension award, 29
—excellence in industry award, 30
—fellows, 20
—international service award, 31
—Lee M. Hutchins award, 28
—Noel T. Keen award, 26
—North Central division, annual meeting abstracts, S156
—Northeastern division, annual meeting abstracts, S163
—officers, representatives, and committees, 14
—Pacific division, annual meeting abstracts, S149
—Potomac division, annual meeting abstracts, S142
—presidential address, Fletcher, 18
—Ruth Allen award, 27
—Southern and Caribbean divisions, annual meeting abstracts, S143
—Southern division, 2004 annual meeting abstracts, S167
—special session abstracts, S119
—Syngenia award, 32
Ammar, E. D., S4, S134
Amsden, B., S106
Amster, I. J., S121
Amvam Zollo, P. H., S75
Anai, T., 730
Andersen, P. C., S44, S59
Anderson, J. B., S45
Anderson, J. M., 1102, S2, S6, S71
Anderson, K. L., 236
Anderson, L. M., 1228
Anderson, R. C., S4
Andrade, O., 875
Andreu, A., S4, S111
Andrews, D. L., S33
Andrews, J. H., S69
Andrianov, V., S85
Angot, A., S121
Anikster, Y., 94, 505, 569, 632, S125
Annamalai, M., S24
Ansley, J. C., S5
Antibiosis, *Pseudomonas syringae*, tomato, metabolites for control, S40
Antoun, H., S164
Aoun, M., S8
Aphanomyces cochlioides
—oospores in soil, survival, S90
—on sugar beet, seedling age and susceptibility, S10
Aphelenchoides spp., PCR-based detection assay, S43
Aphis fabae, *Plum pox virus* vector, North America, 868
Apiosporina morbosa, genetic structure, Canada, S115
Apoptosis, chile pepper fruit, *Colletotrichum gloeosporioides* infection, 1295, cover photo, December
Appel, D. N., S5
Apple
—blue mold, control with yeast and sodium bicarbonate, S45
—fire blight: biocontrol with bacteria, iron bioavailability, 1286; potato leafhopper relation, S142; prohexadione-calcium, S76; stigma exudates and relevance, biocontrol, S86; temperature and flower age effect, 901
—fruit decay, chitosan extracts from fungi, role, S91
—postharvest decay: biocontrol plus heat and sodium bicarbonate, S20; *Penicillium* spp., 44
—proliferation phytoplasma, recovery, 203
—replant orchard soil, seed meal effect, S68
—Rhizoctonia root rot, rapeseed meal amended soil, S20
—scab: biocontrol, application timing, 1305; fungicide resistance, technique, S84; resistance evaluation, technique, S165; resistance gene *Vf*, 364; resistance locus genes, 370
—sooty blotch and flyspeck: complex in China and USA, S100; conidial germination, S102; PCR primers in USA, S100; postharvest control, S40; temperature relation, S41
—storage decay, yeast and biocontrol, S67
—white rot, glyoxylate cycle, 970
Arabidopsis spp.: *Cochliobolus miyabeanus*, novel pathosystem, S81; disease resistance, signaling pathway, S56; oomycete and bacterial pathogens, abscisic acid, S72; response to *Alternaria* and *Pseudomonas*, profiling, S122; RPS4 gene, characterization, S115; *Turnip mosaic virus*, RNA silencing and broad-spectrum resistance, 730
—*A. thaliana*: resistance, bacterial diseases, S135; *Rhizoctonia solani*, no wilt, 289
Aragaki, M., 561, S155
Araujo, W. L., S56
Arauz, L. F., S52
Arboleya, J., S156
Archibald, D. D., S55, S117
Archipiano, M., 578
Ariss, J. J., S5
Armentrout, D. K., S28
Armillaria spp.: genetic diversity in South

Carolina, S93; saprophytic and parasitic, interaction, S22; tree mortality and annual burning effect, S45
—*A. ostoyae*: phylogeography, western USA, S38; on *Pinus pinaster*, primary and secondary infection, dynamics, 125
Arterburn, M., 932
Arvidson, D. N., S59
Ascochyta spp.: on legumes, host specificity, S41
—*A. rabiei*: on chickpea, debris fungus competition, S27; on chickpea, scion and rootstock relation, S17; migration pattern and gene flow, S127
Asenstorfer, R. E., 1207
Ash (see also *Fraxinus* sp.)
—branch dieback, California, S149
Ash, G. J., S163
Ash, J. S., S93
Asher, M. J. C., 209
Asparagus
—*Fusarium* spp., cultural practices and plant age, S166
—*Fusarium oxysporum* and sodium chloride, replanted fields, S164
Aspergillus spp., RNA interference pathway, analysis, S38
—*A. caelatus*, synnema and sclerotium production, substrate effect, S68
—*A. flavus*: on corn ears, aflatoxin and inbred analysis, 1107; on corn kernels, biocontrol, S23; genome sequencing, S122; on maize, chitinase, growth inhibition, 82; on pistachio and fig, atoxigenic strain in California, S26; in soil, spatial patterns in Texas, S45; vegetative compatibility groups, variability, S21; VERB synthase, MAFA, interaction, S28
—*A. niger*, on onion, green protein, S94
Assa, B., S61
Assis Filho, F. M. de, 333, S5
Atallah, Z. K., 737
Aureobasidium pullulans, on apple, rainfall effect, S69
Autio, W. R., S142
Aveling, T. A. S., S55
Avelino, J., S92
Avena sterilis (see also Oat)
—crown rust, virulence pattern in USA and Israel, 505
Avila-Adame, C., S5
Avilés, M., 1094
Avocado, *Phytophthora cinnamomi*, microbial suppression in soil, S68
Ayllon, M., S131
Azad, H., S152
Azalea, Rhizoctonia web blight, plant spacing effect, S21
Azam, M. A., 296
Azevedo, J. L., S56

Babadoost, M., S5, S44
Babin, M., 69
Bacillus, biocontrol symposium:
—formulation, 1267; integrated pest management role, 1272; nature and application, 1244; *Paenibacillus* spp. relation, ecology in agricultural systems, 1252; spore coat, 1249; systemic resistance and plant growth promotion, 1249; taxonomy, 1245
—*B. subtilis*: Pythium damping-off on sugar beet suppressed by, temperature, 351; *Rhizobium* inoculant interaction, dry bean and soybean root rot, S144
Backus, E. A., S6
Bacon, C. W., 796
Bacteria
—Gram-positive, Type III secretion, S123
—multiplex detection, flow cytometry, S105
—plant-associated, phylogenetic and genomic perspective, S83
Bactericides, copper, peach and nectarine phytotoxicity, S56
Bacteriophage, holin and endolysin, genes, *Ralstonia* and *Xanthomonas* control, S87
Bae, H., S6
Bae, J. J., S14
Bae, K. S., S81, S114
Bai, X., S123
Bailey, B., S6, S51
Bailey, D. J., 535
Baker, C. A., S24
Baker, C. J., S88
Bakker, P. A. H. M., S108
Balaji, B., S2, S6
Baldauf, P. M., S163
Balesdent, M. H., 578
Baliji, S., 772, S6
Balogh, B., S6
Bancal, M.-O., 712
Bandele, O., S20
Bandla, M. D., S1, S39
Bandurska, K., S55
Banke, S., S126
Banko, T. J., S6
Bao, Z.-L., 1048
Barak, J., S128
Baranwal, V. K., S35
Barbetti, M. J., S60
Barbosa Neto, J. F., S23
Bar-Joseph, M., S131
Barker, R., S23
Barley
—crown rust, resistance gene *Rpc1*, molecular mapping, 858
—Fusarium head blight, deoxynivalenol accumulation: genetic effect, 766; and resistance, 1145
—leaf spot, physiological, oxidative stress, 584
—net blotch, mapping resistance gene, S32
—powdery mildew, chitinase transcripts, R gene resistances, S114
—Septoria speckled leaf blotch, resistance gene markers, S58
Barley yellow dwarf virus
—*Cereal yellow dwarf virus* comparison, phylogenic analysis, Alaska, S88
—sequencing project, with *Cereal yellow dwarf virus*, S71
—on winter wheat, bird cherry-oat aphids, S170
Barnes, C. W., S6
Barney, W. P., S103
Baron, J. J., S17
Barreto, D., S83
Barros, S., S61
Barta, A., S84
Bashir, N. S., 722
Bassett, C. L., S46
Bastien, C., 1358
Bates, G., S7, S147
Batuman, O., S131
Batzer, J. C., S40, S41, S100, S102
Baum, T., S25, S33, S42, S82, S100
Baumann, K., S11
Baumgartner, K., S7
Bayon, C., S126
Bean (see also *Phaseolus vulgaris*)
—anthracnose, new race, S25
—damping-off, etiology in Iran, S92
—root health, soil bioassay, S1
Bean dwarf mosaic virus, recombinant viruses and viral proteins, S117
Bean pod mottle virus
—on soybean: foliar insecticide timing, S117; insect resistance, S84; vector for gene expression, S114
—soybean line reaction, yield, S19
Beattie, G. A., S17, S91
Beaulieu, C., S26
Beauveria bassiana, on millet seed, biopesticide, S98
Becker, C. M., S140
Becker, J. O., S7, S78, S129, S149
Beckett, R., S71
Beede, R., 388
Beeson, J., S48
Beet curly top virus
—on bean, *Bct* gene for resistance, mapping sequence, 320
—capsid protein, domain mapping, leafhopper transmission, S134
—in snap bean, SCAR marker, S153
—weed and crop hosts in California, S111
—in weeds, New Mexico, S22
Beet necrotic yellow vein virus
—detection in soil, S168
—on sugar beet: control strategies in UK, 209; PCR to quantify resistance, S168; resistance-breaking isolates, California, S62
Beet soilborne mosaic virus, genetic variability, S170
Beever, R. E., 1129
Begomoviruses, species number, S124
Behle, R. W., 1267
Bélanger, R. R., 177, S146, S165
Bell, A., S69
Bellizzi, M., S135
Bellows, C., S65
Belton, M. P., S89
Bemisia tabaci
—begomoviral capsid determinants, S134
—*Cotton leaf crumple virus* vector, evolutionary relations, 1068
Ben Yehuda, P., 94, 632
Ben-Daniel, B. H., 1042
Bender, C. L., S27, S97, S108, S121, S124, S152, S169
Benhamou, N., 177, 693, S146
Bennett, R. S., S7
Benson, D. M., 780, S7, S167
Benson, E., S12
Bent, A. F., S133
Bentley, A. R., S7
Bentley, T. C., S4
Benyvirus, real-time PCR use, S67
Bergdahl, D. R., S163
Berger, P., S138
Bergervoet, J. H. W., 463, S105
Bergot, M., 826
Bergstrom, G. C., 527, S7, S93, S163
Berland, P. A., S8
Bermudagrass (see also *Cynodon* spp.)
—spring dead spot, control strategies, fungicides, S167
—sting nematode, management practice, S170
Berney, M., S129
Bernier, C. C., 236
Bernier, L., 1323, S8, S29
Berruyer, R., S136
Berry, D., S109
Berry, S. A., S84
Bertrand, P. F., S99
Best, V. M., 1172, S41
Bever, J., S119
Bewick, T. A., S137
Bextine, B., S8
Bhagwat, A., S128
Bigelow, D. M., S54, S154
Billings, R. F., S13
Biocide, chlorine dioxide gas, applications, S150
Biofilm
—bacterial and fungal, biocide evaluation, S78
—salmonella and plant organisms, S128
Biological control
—agents and amendments on soil microbes, S56
—apple fire blight, antagonists, factors, 901
—*Bacillus*: potential, S74; for *Sclerotinia sclerotiorum* on canola, zwittermicin A, S116
—*Bacillus* symposium: formulation, 1267; integrated pest management role, 1272; nature and application, 1244; spore coat, 1249; *Paenibacillus* spp. relation, ecology in agricultural systems, 1252; systemic resistance and plant

growth promotion, 1259; taxonomy, endospore formers, 1245
—*B. subtilis*: Pythium damping-off on sugar beet suppressed by, temperature, 351; *Rhizobium* inoculant interaction, dry bean and soybean root rot, S144
—*B. licheniformis* for turfgrass diseases, S109
—*Clonostachys rosea* for *Alternaria* spp. on carrot, 551
—compost tea for damping-off, *Pythium ultimum*, 1156
—endophyte for Verticillium yellows on Chinese cabbage, 412
—foliar diseases, modelling, S112
—Fusarium wilt of chickpea, management factors, 946
—grape plant volatiles: for *Botrytis cinerea*, 924; on kiwifruit, 1280
—*Microsphaeropsis ochracea* on *Venturia inaequalis*, 1305
—mitovirus 3a in *Sclerotinia homoeocarpa* hypovirulent isolates, 917
—nature and application of *Bacillus* spp., symposium, 1244
—nematodes by *Paecilomyces lilacinus*, S51
—oxygen competition, mechanism, S41
—Phytophthora crown rot on squash, watermelon stem blight, S94
—*Phytophthora parasitica* by composted swine waste, 780
—pseudomonads *phlD+*, Ohio, S69
—*Pseudomonas fluorescens* for fire blight, iron bioavailability, 1286
—*Puccinia psidii* and *Oxyops vitiosa* for *Melaleuca quinquenervia*, in Florida, S87
—*Trichoderma*, products, mechanisms and use, S138
—*Trichoderma hamatum*, systemic resistance induced by, factors, S138
—*Trichoderma harzianum*: for *Colletotrichum graminicola* and *Pythium ultimum*, on maize, 147; proliferation in soil, image analysis and protein use, 1383
—*Trichoderma* spp., biofungicide, molecular biology of interaction, S139
—*Trichoderma virens*: defense response elicitor, 171; mechanisms, S138
—yeast, *Botrytis cinerea* on geranium, phylloplane, 196
Biological waste, amendments, compost, health benefits, S127
Bird, G., S129
Birren, B., S122
Bisaro, D. M., S150
Bishop, B., S161
Bishop, J., S24
Biswas, K. K., S8
Black, M. C., 772, S6
Blackwell, L., S63
Blanco, F., S48
Block, C. C., S8, S34
Blodgett, A., S91
Blodgett, J. T., S8
Blomquist, C., 621
Bloomberg, J., S31, S146
Blouin Bankhead, S., S8
Blueberry
—Alternaria fruit rot, postharvest control with fungicides, S10
—anthracnose, bud infection and fruit rot, S25
—*Bacillus subtilis* as flower application, risk, S75
—Botryosphaeria stem blight, susceptibility, S147
—fruit drop, virus association, S66
—fruit surface microflora, biocontrol agents, S91
—Septoria leaf spot, survival analysis, S77
Blueberry scorch virus, detection and analysis, S84
Blumer, S. E., S116
Blumeriella jaapii, on cherry, fungicide sensitivity, Michigan, S86
Blunt, T. D., S8
Boal, R. J., S112
Bobrova, V. K., S67
Bock, C. H., S9, S81
Bockus, W. W., S48
Bodaghi, S., 1337
Bodman, S. V., S103
Boehm, M. J., S93, S102, S115, S159
Boger, C., S144, S147
Bok, J. W., S38
Boland, G. J., 917
Bolda, M., S104
Bolduc, T., S9, S66
Bolger, K. A., S45
Bonacic, I., S44
Bonants, P. J. M., 613
Bond, J. P., S158
Bonello, P., S102, S133
Boore, J. L., S85
Borneman, J., S78, S129
Boronin, A., S67
Borrero, C., 1094
Borth, W. B., S9, S149, S154
Bos, J. I. B., S156
Bossolini, E., 1036
Bostock, R. M., S58, S109, S141
Boston, R. S., 82
Botella, F., 470
Botryosphaeria spp., sporulation, temperature effect, S143
—*B. dothidea*, on apple, glyoxylate cycle, latent infection, 970; conidial dispersal, drop impactions and rain, 1189; on pistachio fruit, temperature and maturity effects, S70; on pistachio, panicle and shoot blight in California, S70;on pistachio, population structure, California, 326
Botryotinia fuckeliana, osmosensing histidine kinase, fungicide response, 1129
Botrytis cinerea
—on geranium, fungicides and phylloplane yeasts, control, 196
—on grape: flower infection, 850; plant volatiles as biocontrol agents, 924
—on lisianthus: airflow system, S103; fungicides, S108
Botta, G., S44
Bottner, K. D., S58
Boucher, C., S121
Bounds, R. S., S156
Bourett, T., S42
Bouvet, G., S8
Bovitz, J. J., S93
Bowden, R. L., 520, 961, 1013, S58
Bowen, K. L., S9, S13
Bowers, T. A., S9
Bowles, M. L., S45
Boyce, A., S74
Boza, E. J., S9
Brachycaudus persicae, *Plum pox virus*, North America, 868
Bradeen, J. M., S71, S91
Brading, P. A., 497
Bradley, C. A., S10, S51, S157
Bradshaw, J., S10
Braga, M. R., S59
Brandl, M., S128
Brannen, P. M., S10
Brantner, J. R., S10
Brassica spp.
—*B. campestris*, Verticillium yellows, endophyte for control, 412
—*B. napus*: major specific resistance genes, 578; Sclerotinia stem rot resistance, mapping, S12
Bredehoeft, M. W., S98
Breeden, J., S2
Bremia lactucae, on lettuce, sporulation factors, 396
Brenneman, T. B., S50, S99, S145, S147, S167, S170
Breuil, C., 1323, S8
Brewer, M. T., S163
Briggs, M., S135
Bright, D. E., S163
Bristow, P. R., S10, S150
Brlansky, R. H., 978, S10, S37, S90
Broad bean mottle virus, temperature and host effect, defective RNAs, 69
Brock, J. H., S146
Brodbeck, B., S59
Broders, K., S10
Bronson, J. J., S11
Broome, J. C., S11, S136

Pangga, I. B., 221
Pantoea spp.
—*P. agglomerans*: antibiotics from, inactivation by *Pseudomonas fluorescens*; on cotton, seed rot in South Carolina, S69; on cranberry, galls, cover photo, November; on cranberry, stem gall, anatomy, 1172
—*P. stewartii*: on corn, biofilm, genes involved, S41; on corn, spatio-temporal analysis, in Mexico, S72; secretome analysis, S103
Papaver somniferum, biotechnological control method, S35
Papaya, yellow crinkle, survival in Australia, S28
Papaya ringspot virus, coat protein, on transgenic papaya, S151
Pappu, H. R., S81
Pardes, E., 632

Patel, N., S82
Pathogen detection
—geraniums, *Ralstonia*, case study, S138
—new tools, S130
—sample strategies, S137
—sampling systems, S138
—technology innovations, in seed, S137
—viruses and stock programs, ornamentals, S138
—viruses and vectors in small fruits, S137
Pathogens
—emerging: GPS and GIS technologies, mapping, S130; mitigating effects, S130
—enteric, postharvest processing and storage practice, S128
—human, survival on plants, S128
—new and emerging, role of NPDN, S129
—weather-based simulations, S130
Pathosystem
—endemism, phylogeographical history, S127
—tropical, spore dispersal, rainfall, S92
Patiño, B., S64
Patte, C. P., 490
Paul, P. A., 1342, 1350, S82
Paulitz, T. C., S77, S82, S94
Paulus, A. O., S151
Pavich, S., S126
Paya, A. R., S163
Payne, G. A., 82, 88, S28, S86, S122
Payton, M., S170
Pea
—promoter gene DRR206, resistance, 651
—*Sclerotinia sclerotiorum*, populations in Pacific Northwest, S47
Peach
—*Mesocriconema xenoplax*, nonchemical control, S77
—*Plum pox virus*, strain M, roguing in France, 1390
—rust, lesion development, analyses, 52
—rusty spot, integrated management, S165
—Sharka disease, roguing in France, S23
Peacock, C. H., S58
Peanut
—aflatoxin accumulation, postharvest, S18
—aflatoxin tolerance and susceptibility, metabolite comparison, S48
—disease risk index, fungi, S50
—early leaf spot: fungicides, delayed application, S145; herbicide and crop residue effect on epidemic, S143; integrated management, S168
—foliar and soilborne diseases: fungicide, S146; fungicide programs, S170
—genomics, EST-microarray analysis, S64
—leaf spot: advisory program, evaluation, S13; suppression by tillage, genotypes, and fungicides, S145
—microclimate, seeding rate and row pattern, S147
—rust, breeding lines and tillage, S168
—strip-till effect, cover crops and disease management, S13

Peanut mottle virus, *Peanut stripe virus* comparison, detection with grid RT-PCR, S34
Peanut stunt virus, on *Nicotiana benthamiana*, ribbon-like inclusions, 722
Pear
—gray and blue molds, postharvest fungicides, S149
—scab, multiple defense response, induced resistance, 604
Pearce, M., S82, S146
Pecan, scab:
—fungicide programs, S167
—propiconazole sensitivity, S99
Pedersen, J. F., S32
Pedersen, W. L., S12
Peek, D. R., S47
Peeters, N., S121
Peever, T. L., S24, S27, S41, S127

Pekarek, R. A., S83
Pelter, G. Q., S26
Peltier, A. J., S161
Peng, J.-L., 1048
Peng, S., 672
Penicillium spp., on apple and citrus fruit, acidification and virulence relation, 44
—*P. digitatum*: azoxystrobin, fludioxonil, and pyrimethanil, sensitivity, S49; on citrus, air-sampling method, S97; on citrus, *Verticillium lecanii*, chitosan, 693; on citrus, wounded fruits, cover photo, July
Pennisetum glaucum
—fungi and mycotoxins, S48
—grain mold, germplasm accessions, *796*
Pennisetum mosaic virus, molecular variation, S29
Pepper (see also *Capsicum annuum*)
—bacterial spot, management in Oklahoma, S168
—famoxadone and cymoxanil for, management, S66
—harpin protein treatment, resistance induced, S56
—major resistance genes, systemic acquired resistance, 1376
Pepper, A. F., S83
Pepper veinal mottle virus, on *Datura stramonium*, Nigeria, S101
Pérarnaud, V., 826
Perchepied, L., 1331
Percich, J., S144
Peres, N. A. R., S3, S64, S70, S83, S94
Perez, B. A., S83
Perez, E. A., S154
Perez-Hernandez, O., S83
Perna, N. T., S20, S83, S95
Peronospora spp.
—*P. antirrhini*, on snapdragon, conidial concentrations, S13
—*P. parasitica*, resistance pathway, genetic dissection, S107
—*P. tabacina*, on *Nicotiana obtusifolia*, necrotic lesion resistance, 1178
Perry, K. L., S163
Pesticide residues, detection using electronic aroma, S110
Pest management, rice, priorities in tropical Asia, 672
Pest risk analyses, risk ratings, USDA, S59
Pest risk assessment, teaching, case study in Iowa, S10
Peter, M., S133
Peters, D., 706, S134
Peters, J., S105
Petersen, J. C., S154
Peterson, D. L., S45
Peterson, P. D., S22, S66, S83

Petrovic, N., S84
Petzoldt, C. H., S1
Petzoldt, R., 147
Pfender, W. F., 308, 999, S84
Pfirrmann, J., S45
Phaeomoniella chlamydospora, on grape cordons, spore release in California, S28
Phaeosphaeria spp., on cereal, glyceraldehyde-3-phosphate dehydrogenase genes, S105
—*P. nodorum*, on winter wheat, telemorph frequency in North Carolina, S21
Phakospora pachyrhizi
—protein identification, mass spectrometry, S69
—on soybean, sequence tags and stages, S85
Phaneendra, C., S35
Phaseolus vulgaris (see also Bean)
—anthracnose: cultivar resistance, S158; resistance sources from Brazil, S162
—*Beet curly top virus*, *Bct* gene for resistance, mapping, 320
—common bacterial blight, genetic diversity and coevolution, 593
—diseases in North Dakota, S39
—pod rot, prevalence in Arkansas and Missouri, S101
—rust: resistance in Mozambique, S47; resistant cultivar, S107
—seedling diseases, S-metolachlor treatment, S167
Phellinus weirii, on Douglas-fir, gene cloning, thaumatin-like protein, 1235
Phelps, K., 268 *Phialophora* sp., on grape, California, S151
Phibbs, A., S84
Philion, V., S84, S165
Phillips, C. T., S96
Phillips, D., S60
Phillips, J. L., S1, S95
Phoma spp.
—*P. medicaginis*, on alfalfa, transformation by *Agrobacterium*, S25
—*P. sclerotioides*, on alfalfa, 14 isolates tested, S152
Phylloplane, yeast:
—bentgrass and tall fescue effects, irrigation, S4
—geranium disease control, fungicides, 196
Phyllosphere, epiphytic bacteria, biosensors, S17
Phyllosticta telopeae, on waratah, populations and ecosystems, S84
Phylogeny, cytochrome P450s, pathogenic and nonpathogenic fungi, *1032*
Phytoalexins, rice blast, silicon effect, 177
Phytophthora spp.: on avocado and citrus, soil microorganisms for management, S125;
—in hardwood forest, Appalachian Mountains, USA, S118; irrigation regimes and disease, S153; molecular identification, RFLP, 983; phylogeny, mitochondrial DNA, S66, on taro, in Hawaii, S155; zoospore movement and infection in water, S79
—*P. cactorum*, FAME profile analysis, S39
—*P. capsici*: on chile, soil water effect, S91; on cucurbit, inoculum from irrigation water, S157; mefenoxam sensitivity and mating type, overwintering, S158; on pepper, fertility amendments and tillage, S62; on pepper, hydroponic culture, S76; sensitivity to mefenoxam, dimethomorph, zoxamide, and cymoxanil, S50; soil solarization, Florida, S144; on vegetables, fungicides, S5; vegetable seedling resistance, irradiation, S44
—*P. cinnamomi*: on avocado, resistance, S85; on oak, winter temperature mapping, France, 826; on ornamentals and Fraser fir, dimethomorph and phosphites for, S167
—*P. erythroseptica*: mefenoxam resistance, inheritance, S156; mefenoxam-resistant isolates, Idaho, S85
—*P. infestans*: on *Arabidopsis*, nonhost resistance, S159; avirulence genes, comparative genomics, S156; chemical control, Argentina, S4; extracellular protease inhibitors, counterdefense, S136; *GIP* gene family, molecular cloning, S24; glucanase inhibitor proteins, S136; metalaxyl response, isolates, S5; population history, DNA sequence, S35; on potato, fungicides in Ecuador, S101; on potato, genetic diversity, in Ecuador, 154; on potato, genotype and storage temperature, S2; on potato, inhibitor proteins, *1031*; sporangium-specific genes, function, S53; spore development, signal transduction, S48; survival below 3°C, S157; survival in surface water, 380; zoosporogenesis, temperature-dependent gene expression, S101
—*P. nicotianae*, on periwinkle, biopesticides, inoculants, biorational products, S113
—*P. parasitica*: races, variety rotation effect, S169; suppression in compost, swine waste, 780
—*P. ramorum*: American and European populations, diagnosis, 613; on conifer shoots, S16; on Douglas-fir, fungicides, S16; in forest and nurseries, isolate virulence in Oregon, S81; in forests, eradication strategy in Oregon, S35; on oak, Oklahoma survey, S106; on oak and other species, detection in California forest, PCR assay, 1075; in Oregon forests, monitoring, S48; on ornamentals, North Carolina, S7; persistence in plants and soil, S95; quantification, real-time PCR, S40; recovery from plant material, molecular detection, 621
—*P. sojae*: races, comparison, S160; on soybean, defense genes in two cultivars, S21; on soybean, disease susceptibility genes, S70; on soybean, management in Illinois, S65; on soybean, partial resistance, S159
Phytoplasma
—on apple, recovery in trees, ultrastructure, 203
—genomics, structural and functional, S123
—on lettuce, strain analysis, molecular, 842
—onion, insect transmission, analysis, 244
—phytoplasma: phylogenetic analysis, on concatenated proteins, S116; potato purple top and potato witches'-broom, relation in USA, S58; SecA membrane protein, antibody, 683
Phytotoxin, thaxtomin A, auxin amelioration, S102
Piche, L. M., 1368
Pierson, E. A., S64
Pierson, L. S., III, S64
Pieterse, C. M. J., S108
Pietrowicz, J., S80
Pilet-Nayel, M. L., 578
Pinaria, A., S61
Pinchback, M., S8
Pine
—anatomical response to stress or infection, S107
—defense response, biochemistry, S133
—loblolly: decline, resin duct necrosis, S107; fusiform rust, resistance, S170; genetic architecture of interactions, S133
—ponderosa: Armillaria root disease, fire effect, S8; black-stain root disease, inoculation, S79
—white, blister rust, gene distribution, western North America, 751
Pineapple, mealybug wilt:
—diversity, *1031*
—transgenic plants, S154
Pinkerton, J. N., S55
Pinnow, D. L., S34
Pino Del Carpio, D., S84
Pinson, S. R. M., S47
Pinus spp.
—*P. contorta*, *Gremmeniella abietina*, resistance to European race, S164
—*P. pinaster*, *Armillaria ostoyae*, primary and secondary infection, dynamics, 125
Pistacia spp.
—*P. atlantica*, Verticillium wilt, rootstock effects, 388
—*P. vera*, *Botryosphaeria dothidea*: conidial dispersal, rain effect, 1189; population structure, California orchard, 326
Pitchay, D., S62

Pitman, R., S168
Pitrat, M., 1331
Pittman, R. N., S34, S145
Pivonia, S., S80, S83, S84
Plant health, border cells, specific gene expression, S109
Plant medicine, program, University of Florida, S147
Plasmodiophora brassicae, genetic variation, analysis, Korea, S40
Plasmopara viticola, grape, epidemics, S50
Plattner, R. D., S120
Plectosporium tabacinum, on snap bean, new disease in New York and Maryland, S26
Ploetz, R. C., S85
Plum pox virus
—aphid vectors, North America, 868
—detection and quantification, S93
—host range, aphid transmission, S24
—on peach, strain M, roguing in France, 1390
—stone fruit survey in New York, S97
Pniewski, T., S55
Poa trivialis, rapid blight, fungicides, S154
Podosphaera spp.
—*P. clandestina*, on sweet cherry, biology, S13
—*P. macularis*, on hop, spatial pattern analysis, Pacific Northwest, sampling, 1116
—*P. xanthii*, on cucurbit, fungicide resistance, S69
Pogany, J., 69
Pogrebnyak, N., S55, S85
Polek, M., S85
Pollution, air, phyllosphere-mediated removal, S91
Polston, J. E., 490
Polygalacturonase-inhibiting protein, cantaloupe fruit, 337
Polymyxa graminis, soilborne virus vector, wheat, 527
Pomegranate, wilt, biocontrol, S43
Pomella, A. W., S25
Pond, E., S68
Poplar, leaf rust, quantitative resistance, 1358
Poplawsky, A. R., S85
Porchas, M., S67, S153
Porter, L. D., 380, S85
Porter, P., S10
Posada-Buitrago, M. L., S85
—ethanol and temperature effect on spores, S71
Postharvest pathology
—antagonist for fruit wounds, bioreporter system, S46
—*Botrytis cinerea*: on grape, biocontrol, 924; on kiwifruit, biocontrol with grape volatiles, 1280
—citrus green mold, biocontrol, chitosan comparison, 693
—ethanol and temperature effect on spores, S71
—*Penicillium* spp. on apple and citrus fruit, acidification and virulence relation, 44
Postman, J. D., S104
Postnikova, E., S85, S88
Potato (see also *Solanum* spp.)
—black dot, azoxystrobin and inoculum source, S76
—brown rot: bacteria, Russian Federation, S67; virulence and temperature relation of pathogen, 463
—certified tubers, fungal diseases, S90
—common scab: cultivar resistance, S110; nitric oxide and phytotoxin, S106; resistance induced, S158; *Streptomyces* effect, S108
—cultivars, endomycorrhizal colonization, transgenic, S103
—early dying, nematode and Verticillium wilt relation, S78
—late blight: forecasting, logistic regression analysis, S40; genetic diversity, host specificity, Ecuador, 154; genotype diversity and disease, S77; pathogen survival in surface water, 380; R gene, tissue-specific, S71; resistance and fungicide application, management, S160; resistance and fungicide management, S54; spatial pattern analysis, aerial photography, S152; temperature, photoperiod, phenolic deposition, S161; tuber resistance, major R-gene, S68
—*Phytophthora infestans*, interaction, S87
—pink rot, fungicide evaluation, S78
—pink rot and Pythium leak, phosphorous acid effect, S44
—postharvest late blight, biocontrol in storage, S96
—Rhizoctonia disease: microbial antagonists and ryegrass rotation, S163; Moncut fungicide, S153
—*Rhizoctonia solani*, anastomosis groups, detection device, 280
—silver scurf, postharvest fungicides and disinfestants, S71
—smut, molecular analysis, 875
—stem rot, diversity and outcrossing, Washington, 737
—virus survey in New York and Maine, S163
—viruses and weed hosts, epidemiology, S154
Potato leafroll virus
—coat protein, virion stability and aphid transmission, S58
—strain specificity and replicase gene, S154
Potato virus X, vector for *Peanut stunt virus* coat protein, 722
Potato virus Y: transgenes and RNA silencing, S97; diversity among isolates, 1368
Potebniamyces pyri
—conidial germination, factors, S62
—on pear: growth and sporulation factors, S112; inoculum availability and survival, S112
Poussier, S., S136
Powell, C. A., S86
Powelson, M., S125
Powers, K., S65
Powers, L. B., S152
Poza-Carrión, C., S128
Prabakar, K., S151
Pradhanang, P. M., S46
Prasadbabu, G., S35
Pratt, P. D., S87
Pratt, R. G., S86
Presting, G., S65
Price, M. S., 82, S86, S122
Proctor, R. H., S120
Proffer, T. J., S86
Prom, L. K., S146
Prunus pp.
—cherry foveaviruses, RT-PCR assay, S60
—replant disease, fallow and rotation effect, S11
Prusky, D., 44
Pruvost, O., 138
Pryor, B. M., S42, S68
Pseudomonas spp.: bacteriocin activity, S67; hydroponically grown plants, population enhancement, S80
—*P. aureofaciens*, adhesion/biofilm formation, phenazines, S64
—*P. chlororaphis*, multiple pathogen control, S115
—*P. fluorescens*: extracellular protease, antibiotic inactivation, 1228; long-term survival, in soil, S4; on pear and apple, iron bioavailability, 1286; Pythium damping-off on sugar beet suppressed by, temperature, 351; in rhizosphere, genotype competition, S24; take-all disease relation, suppression, S105; on wheat and pea, root colonization, S67; in wheat and pea rhizospheres, transgenic, S8
—*P. putida*: biofilms and stress tolerance, low-water habitat, S15; on corn and velvetleaf, electron microscopy, S31; survival, cell envelope constituents, S105
—*P. syringae*: alginate gene expression, S152; on *Arabidopsis*, systemic resistance, induction, S108; on *Brassica* spp., coronatine effect in pathogenesis, S27; coronatine, regulation, S169; on crucifer, cover crop mixture, S150; on crucifers, host range, S12; diverse plant interaction, S121; innate immunity, suppressors, S136; model organism, S121; on olive, knot formation, *hrp*-dependent, 484; osmosensitivity and osmoprotection in strains, S17; phytotoxin, SalA regulon, S63; programmed cell death, S110; quorum sensing, virulence and epiphytic fitness, S27; secretion systems and comparative genomics, S121; on sweet cherry, budsticks in New York, S104; on sweet cherry, epidemic in Michigan, S87; on tomato, antibacterial metabolite production, regulators, S40; on tomato, coronatine regulation, S97; on tomato, functional genomics, gene-specific insertion mutants, S16; on tomato, screening method, S108; on tomato and Arabidopsis, *HrpA* mutants, S59
Pseudotsuga menziesii, *Phellinus weirii*, gene cloning, thaumatin-like protein, 1235
Psidium guajava
—*Myrothecium verrucaria* in nematode interaction, in Mexico, S143
—nematodes on, activity in Mexico, S143
Puccinia spp.: on barley, substomatal vesicles, cover photo, January; on cereals and grasses, detection using real-time PCR, S6; on ornamentals and sweet corn, light effect on spore germination, S73
—*P. allii*: on garlic and chives, DNA sequence analysis, 569; teliospore germination, cover photo, June
—*P. coronata*: on barley, gene mapping, 858; on wild oat, virulence pattern in Israel, USA comparison, 505
—*P. graminis*: on perennial ryegrass, phenology, 308; on ryegrass, fungicide and plant spread, S84; on ryegrass, secondary spread, cover photo, March
—*P. hemerocallidis*, urediniospore production, fungicide spray, S111
—*P. jaceae*, yellow starthistle control, California, S12
—*P. lagenophorae*, biocontrol agent, S142
—*P. recondita*, on cereal and grasses, taxonomy, S125
—*P. sorghi*, on sweet corn, epidemic source in New York, S95
—*P. striiformis*: epidemics and races in USA in 2003, S18; on wheat, temperature effect on aggressiveness, S95; on wheat and barley, resistance genes, inappropriate *formae speciales*, S80
—*P. thlaspeos*, on *Isatis tinctoria*, biocontrol agent, inoculum production, S155
—*P. triticina*: on *Aegilops speltoides*, new *forma specialis*, 94; on durum wheat, worldwide collections, S79; on wheat, genetic variation and virulence, 632; on wheat, management and mixtures, 961; on wheat, quantitative trait locus, tagging for resistance, 1036; on wheat, uredospore production, nitrogen effect, 712
Puchalski, B., S63
Pueraria lobata, soybean rust role in USA, S83
Pumpkin, powdery mildew, milk as foliar spray, S164
Punja, Z. K., S86
Pusey, P. L., 901, S86
Pyrenophora spp.
—*P. semeniperda*, geographic range, 805
—*P. tritici-repentis*: races, Czech Republic and Poland, S3; on wheat, distribution in Ohio, S28; on wheat, management and mixtures, 961
Pyricularia grisea, on rice:
—gene on chromosome 1, 515
—molecular characterization, Arkansas, S9
Pythiogeton spp., on cypress and English ivy, North Carolina, S95
Pythium spp.: on bermudagrass, golf course putting greens, S81; on cereals, PCR identification in Washington, S94; greenhouse crops, damping-off and fungicide dose, S33; identi-

fication, molecular fingerprint, S55; ornamental nursery, irrigation, S54; survey in Taiwan, S41
—*P. christmatum*, from Fraser fir, corn *Pythium* comparison, S1
—*P. dissotocum*, in nursery irrigation water, fungicide resistance and pathogenic fitness, S14
—*P. pseudointermedium*, from corn, *Pythium* from Fraser fir comparison, S1
—*P. ultimum*: on maize, *Trichoderma harzianum* effect, 147; seedling damping-off suppressed by, compost tea, 1156; on sugar beet, damping-off suppressed by bacteria, soil temperature, 351

Resistance
—apple to scab: resistance gene *Vf*, breakdown, 364; resistance locus genes, 370
—barley to Fusarium head blight, deoxynivalenol relation, 1145
—*Brassica napus* to *Leptosphaeria maculans*, major genes, 578
—cassava to bacterial blight, quantitative trait loci and pathotypes, Africa, 1084
—corn to: Aspergillus ear rot and aflatoxin, 1107; fumonisin, Fusarium ear and kernel rot, 251
—gene function in pathogenicity and host specificity, S136
—Japanese pear to scab, induced resistance, 604
—lentil to *Colletotrichum truncatum*, races, 236
—melon to *Fusarium oxysporum*, race 1.2, 1331
—nematodes and aphids, underlying pathways, S112
—pea to disease, elicitor-coding gene, 651
—pepper to disease, major genes, systemic acquired resistance, 1376
—*Phaseolus vulgaris* to *Beet curly top virus*, *Bct* gene, 320
—poplar to leaf rust, genetic factors, 1358
—rice to blast: ethylene induction, 819; gene on chromosome 1, 515; *Pi-ta* gene, 296
—rice to *Magnaporthe grisea*, gene *Pi7(t)*, 302
—soybean to *Soybean mosaic virus*, analyses, 687
—species concept, host pathogen interaction, S124
—systemic, induced on maize by *Trichoderma*, 147
—*Thinopyrum ponticum* to *Tapesia yallundae*, group 4 chromosome, 932
—*Thinopyrum intermedium* to *Cereal yellow dwarf virus*, 1102
—tomato to *Tomato yellow leaf curl virus*, *Rep* gene sequences, 490
—watermelon to Fusarium wilt, quantification, 832
—wheat to: leaf rust, quantitative trait locus, tagging, 1036; Septoria tritici blotch, partial, 497; Septoria tritici blotch, *Stb4* gene, 1198; *Stagonospora nodorum* leaf blotch, mapping, trait loci, 1061
—woody plants, herbaceous plant model relevance, S133
Restrepo, S., S87
Reszka, E., S105
